FURNITURE

he widespread adoption of digital technologies as well as electronic medical records in the health care sector might lower costs and reduce errors, but it also may come with a hidden risk: increased musculoskeletal injuries among doctors and nurses. More and more research is pointing to the simple fact that Repetitive Stress Injuries are on the rise among this diverse workforce.

Since 1994, AFC Industries, Inc. has designed and manufactured a user centric line of ergonomically designed workstations, point-of-care carts, wall mounts and i-Centers[™]. These height adjustable units guarantee the right height for standing desks as well as traditional sitting levels which can accommodate a diverse healthcare workforce to enhance performance, comfort and satisfaction in the fast-paced modern work arena.

Whether you require assistance in choosing the appropriate components to configure a product or a complete room redesign, our staff of engineers and ergonomic design experts is available to provide you with the solutions you need for your projects.

Whatever your needs, AFC Industries, will manufacture your solution!

Remember too, that additional designs and models are available at www.afcindustries.com.

INTERACTIVE WORKSTATIONS

Making work comfortable and productive

Ten years ago, back injuries in the workplace were most commonly attributed to heavy lifting. These days, the cause is more likely to be related to sitting at a desk for prolonged periods of time. The average age of carpal tunnel syndrome sufferers was late 30s to early 40s — it is now mid 20s. Furthermore, you can add the increasing incidence of neck, shoulder and arm pain; tension headaches; pain, swelling and stiffness of joints; eyestrain and vision problems; stress.

At AFC Industries, we take the science of work place ergonomics very seriously. We understand that different users have different needs. AFC workstations are electronically heightadjustable at the touch of a button. Independent adjustment of monitor height and focal length for optimal viewing. Digital readouts to preserve and easily return to your ideal settings for surface and monitor placement. Available with surface tilt and a host of valuable features.

Our flexible workstations come in a wide variety of sizes, shapes, multitiered designs, and color options that accommodate virtually any location and workplace need. Truly flexible, adjustable and they adapt to you!

Features & Benefits

Electronic height adjustment of work surface

Electronic adjustment of monitor height and focal length

Pressurized and scratchresistant long-lasting laminates in a variety of colors (for standard colors, see page 39)

Pop-up data ports and a built-in USB hub embedded in the work surface

Light and sound barrier partitions

Complete wall-to-wall installation services

The Whitestone™

The Whitestone[™] workstation is AFC's radiology dream station. Complete electronic adjustment capabilities are the foundation of this highly adaptable workstation — for surface height in sit or stand positions, surface tilt, and both vertical and horizontal adjustment of monitors.

The monitor brackets support large monitors weighing up to 100 lbs, responding to a growing interest in larger images. We have added acoustical properties to our wraparound privacy partition to reduce extraneous sounds and create a quieter environment for concentration. Multi-channel cable management keeps wires neat and unobtrusive.

Electronic Monitor Mounts -

LCD Monitor Arms on telescopic drives with electronic adjustment of monitors' height and focal length.

Electronic Height & Tilt -

Easy electronic adjustment of the work surface height and tilt. Digital readout for desk height with four memory presets. This enables every user to preserve optimal settings.

— Lighting

Adjustable LED backlight with dimmer control alleviates eye strain and improves readability of images.

Data & Power Ports

Pop-up units include Ethernet network and parallel ports, as well as standard AC power outlets. Separate USB hubs include four ports.

Soundproofing

Acoustical partitions help to cut down on the background noise and improve concentration. **Cooling System**

Monitors and CPU generate a lot of heat. Dissipate it quickly with the advanced environmental control system.

Deluxe Ergo Tier™

We're pleased to offer well-designed, durable furniture that reduces the risk of strain and injury, while helping to maximize performance in the mission-critical healthcare role.

The Deluxe Ergo Tier[™] workstation is designed to meet the need for easy electronic adjustment of the work surface height and tilt, as well as independent monitor positioning for height and focal length. The workstation can be enhanced with privacy partitions, shelving, computer storage, and other accessories.

Electronic Monitor Mounts

LCD Monitor Arms on telescopic drives with electronic adjustment of monitors' height and focal length.

Electronic Height & Tilt

Easy electronic adjustment of the work surface height and tilt. Digital readout for desk height with four memory presets. This enables every user to preserve optimal settings.

Lighting Our AmbiTask Light Combo can be controlled with independent dimmer switches for total operator regulation of workstation lighting.

Connect secondary devices with our pop-up data power port and USB hubs.

Laminate finish

Pressurized and scratchresistant long-lasting laminates in a variety of colors (see page 39 for standard colors or call us for any other color).

AFC's flexible workstations are designed with ergonomic intelligence for a wide range of users and needs. They help to reduce stress and injuries, and allow radiologists and healthcare professionals work more comfortably and effectively.

The Ergo Tier[™] has independent, electronic height adjustment of the work surface and monitor platform. This is but one of the 6 monitor platform choices available to you (see next page for descriptions).

Electronic Monitor Mounts LCD Monitor Arms on telescopic drives with electronic adjustment of monitors' height. Electronic or manual adjustment of monitor forward/backward motion.

Electronic Height

Electronic adjustment of work surface height. Digital readout for desk height with four memory presets.

Laminate finish

Pressurized and scratch-resistant longlasting laminates in a variety of colors.

Cable management

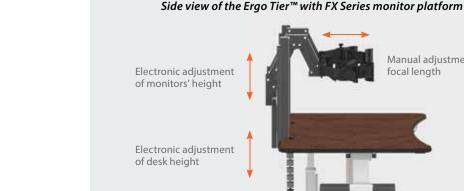

Multi-channel wire manager keeps wires neat and unobtrusive and allows for important separation of power and electric wiring.

Accessories A pencil drawer, split shelves and additional accessories are also

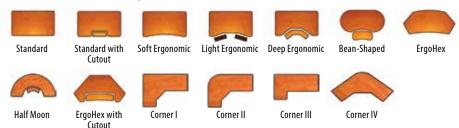

available. See pages 34-37 or our web site for details.

Electronically Adjustable Monitor Platforms

- EFX Series • Electronic adjustment of monitor height • Electronic adjustment of monitor focal length
- Side wings allow outer monitors to form an arc

RX Series • Electronic adjustment of monitor height • Horizontal sliding of each monitor on the track

- SW Series • Electronic height adjustment of slatwall • Manual adjustment of monitor focal length
- Horizontal sliding of each monitor on the slatwall

- FX Series • Electronic adjustment of monitor height • Manual adjustment of monitor focal length
- Side wings allow outer monitors to form an arc

ZX Series

- Electronic adjustment of monitor height • Manual adjustment of each monitor focal length
- Horizontal sliding of each monitor on the track

TS Series • Electronic height adjustment of monitor shelf

• Monitors can be free-standing or permanently attached.

You can combine one of our electronically adjustable monitor platforms with any work surface shape shown at the top of this page.

Sample Configurations

A. Ergo Tier[™] EFX 60"W x 34"D:

- Electronic adjustment of work surface height
 Electronic adjustment of
- monitor height and focal length
- Monitor platform on telescopic drives with two monitor holders # AFC2530 for large screens
- Adjustable CPU Holder # CPU 13-25

B. Ergo Tier[™] SW 60"W x 30"D:

- Independent electronic height adjustment of work surface and monitors
- 10"-high slatwall on telescopic drives with a 12-inch upward stroke
- Two Z-series Monitor Arms #AFCZ666-01
- Two Z-series Monitor Arms
 #AFCZ566-01 on 20" vertical
 track
- LED Task Light # TAL400
- Pop-up data port & USB hub
- Two desk-mount CPU holders # CPU-01

C. Ergo Tier[™] TS 60"W x 30"W:

- Independent electronic height adjustment of work surface and monitors
- Monitor shelf on telescopic drives with a 12-inch upward stroke
- 3-outlet power strip
- Desk-mount CPU holder
 # CPU-01

D. Ergo Tier[™] ZX 60"W x 36"D:

- Independent electronic height adjustment of work surface and monitor platform
- Three Z-series Monitor Arms sliding left-right in 56-inch track mounted on telescopic drives # AFCERGO03_Z
- Acoustical partition
- Two wire managers # WMF100

NEW

Dual Tier[™]

The Dual Tier[™] has two independently adjustable surfaces. With the simple touch of a button you can adjust the height of the monitors and work surface from a seated to a standing position. In the bifocal setting, the monitors are lower than the work surface, ensuring a comfortable viewing angle. This flexibility delivers optimum body positioning and comfort.

Electronic Height

adjustment of both tiers. Digital readout for each tier's height with four memory presets to preserve and easily return to

MOBILE DATA ACCESS

Providing data where and whenever it's needed

Mobile carts bring critical information to Point-of-Care locations throughout Healthcare facilities. Whether it involves admissions, pharmaceutical, radiological or telehealth video conferencing, daily patient care decisions must be accurately made and supported by the most current data available. AFC's array of durable mobile carts is designed to meet this growing need, while incorporating important ergonomic features that make them adaptable to any user.

Our height adjustable units are available with small footprints for easy maneuvering in tight places. Security features protect both sensitive patient information and computer equipment and our carts are built from materials for thorough disinfection. Long-lasting batteries (Hot Swappable/LiFe/SLA Power Supply) can be loaded so that carts can move from area to area, without being connected to electrical outlets, providing uninterrupted power to your workstation wherever, and whenever you need it.

Whatever your need is, AFC can build a mobile cart solution for you.

Teleradiology Is Here To Stay

The debate rages on as to whether Teleradiology is a help or hindrance to traditional Radiology departments and practices.

The emergence of Healthcare IT and the most recent healthcare reforms (over 45 million uninsured Americans will now have access to healthcare insur-

ance coverage) will put additional pressures onto already stretched resources and physicians. This, in turn, will fuel the growth of Telemedicine/Teleradiology practices to allow the system to obtain the additional radiology services that are required.

AFC Industries has created highly mobile and ergonomic solutions especially for this growing discipline. From something as simple as discussing a case over the telephone, or as complex as using satellite technology to conduct a real-time consultation between medical specialists in

two different countries, our Teleradiology Carts can fit all situations. Available in a variety of sizes and shapes and equipped with camera holders, these units have become a mainstay in the transference and sharing of medical imagery.

Teleradiology Video Cart PC910-303

Our newest electronically

height adjustable teleradiology cart PC910-303 provides a fully integrated, mobile computing workstation designed for enhanced efficiency when health services through advanced applications are necessary.

Medical and non-medical devices can be easily connected to the carts systems' enabling high definition, real-time images to be shared providing the best diagnosis and care regardless of geographical or physical constraints. The combination of a compact design with a strong ergonomic focus makes this cart ideal for point-of-care applications.

NEW

MOBILE DATA ACCESS

Teleradiology Cart TMC300

The telemedicine cart TMC300 is a pneumatically height adjustable unit with an optional battery power source for true mobility. It is available with standard VESA-compliant mounting brackets (75/100), a locking drawer, camera mount and room for an all-in-one or a thin client computer. Sleek, efficient and easy to move with the integrated handles and four 4-inch casters.

Teleradiology Cart XPC1926

The XPC1926 cart comes with two pneumatically height adjustable surfaces. Fully articulating VESA-compliant monitor arms, a spacious 15"W x 11"D x 4"H locking drawer, retractable keyboard tray, enclosure for CPU and the battery power source; and camera mount makes this cart an ideal unit for video conferencing.

Plasma Cart[™] XLCD300-01

The Plasma Cart[™] is ideal for meetings, presentations, seminars, conferences and signage. Accommodating up to a 55" flat screen, this stable unit is a perfect solution for data and video access as you bring your large flat screen and necessary electronic equipment to where it is needed. All the components of the Plasma Cart are height adjustable. Internal wire management is built in behind easy-to-remove access panels.

Pole Cart[™] MPC200

A truly customized item. The Pole Cart[™] begins as a blank canvas with a wheeled base and main pole assembly. Everything you select to include becomes height adjustable and can rotate 360° around the pole. Monitors, CPU holders, keyboard trays, camera mounts, additional shelves, scanner and speaker holders and more. Built-in wire management keeps everything neat and tidy. A product that will meet your needs because you "design it".

PC Cart[™]

Our PC (Point-of-Care) Carts[™] are designed for maximum flexibility and streamlined movement. They enable physicians to bring advanced computer technology to the bedside, operating room and any other location where patients will benefit from today's medical computer applications.

The PC Carts[™] feature a low profile, small footprint, pneumatic (optional electronic) height adjustment, and support all-in-one computers as well as separate thin client and monitor. For maximum portability, the carts can accommodate a battery power source (go to *www.afcindustries.com/Batteries* for power supply options).

Features and Benefits

- Pneumatic height adjustment
- Thorough disinfection for "clean room" use
- Supports all-in-one computer
- as well as separate thin client and monitor
- Mounting for all-in-one computer or standard monitor VESA (75/100)
- Phenolic, HDPE¹, or laminate work surface
- Seamless integration of handles into the work surface on all four corners for easy grip from any user position

Optional

- Electronic height adjustment Keyless electronic lock for utility drawer and divider to facilitate administration of care in two-patient rooms
- HDPE retractable keyboard tray with ergonomic negative and positive tilt and swivel
- Power supply, wire manager, mouse holder, wire basket, scanner holder, and additional accessories available
- Antimicrobial finish (see page 38 for more information)

1 High-density polyethylene (see inside back cover for more information)

PC Cart[™] 910

The PC Cart[™] 910 combines a streamlined look and enhanced functionality with the hallmark durability and ergonomic design of AFC's mobile work stations.

With an all-in-one computer, the height-adjustable PC 910 offers a battery that can run for up to 25 hours before recharging. UL 60601-1 compliant, it is safe to use throughout facilities. Fleet management software allows for IT monitoring, management, and programming of carts for location, battery status, and scheduling of computer shutdown, recharging and maintenance.

Monitor Mounts

Supports all-in-one computer as well as separate thin client and standard monitor VESA (75/100).

Easy Grip

Cutout handles on all corners facilitate grip and access from any user position.

Cable Management

Multi-channel wire manager keeps wires neat and unobtrusive

Mobility

Four 5-inch casters with round tread wheels for ease of movement.

Antimicrobial Finish

A HDPE work surface now available with antimicrobial protection.

Pneumatic Height Adjustment

Side lever easily adjusts the height of the work surface to be comfortable for the end user.

Electronic Lock

Utility drawer with a keyless electronic lock and divider to protect documents and medications.

Adiustable **Keyboard Tray**

The retractable phenolic keyboard tray features tilt, swivel, and a sliding mouse tray for both left and right-handed users.

WALL MOUNT SOLUTIONS

Making the most of limited-space

High traffic areas. Tight places. Operating rooms and emergency rooms. Inside and outside patient rooms. These are just some of the areas that are perfectly suited for AFC's variety of mounting solutions. Height-adjustable versions for seated or standing positions. Adaptable to any user. Making empty wall space productive.

Decentralizing the availability of data for a greater return on investment in plant and human capital.

Combo Arms AFC7808 and AFC7810 Series

Our flexible AFC7808 and AFC7810 series offer height-adjustable, low-profile, user-friendly solutions for access to electronic records where space is at a premium. The wall mount accommodates most operators, in sit-to-stand positions. When not in use, it folds up neatly to the wall, tucked away and unobtrusive.

The AFC 7810 arm has an additional 10-inch vertical monitor adjustment, as well as, 35° of forward and backward tilt to make sitting or standing viewing more comfortable.

Pneumatic Height Adjustment

The arm is pneumatically height adjustable within a 12-inch range and can be locked in any position you chose.

Flexible

Arm vertically adjusts on wall mounting track and has full range of swivel motion at each joint to accommodate different positions and applications.

Integrated Wire Management

Integrated wire management for clean, concealed and neat routing of cables.

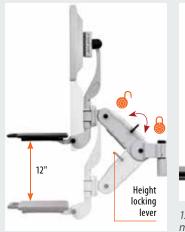

VESA 75/100 compliant monitor bracket with horizontal and vertical tilt and 3-inch range of height adjustment.

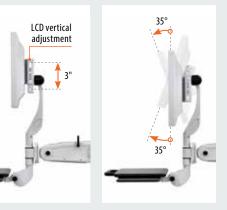

Antimicrobial Finish

Light-weight aluminum construction with antimicrobial coatings for thorough disinfection.

Low Profile

Keyboard tray with handle and sliding mouse tray easily folds up, saving space when not in use.

12-inch range of height adjustment accommodates most users while standing or seated

Wall Mounts

AFC Wall Mounts are the perfect space-saving solution for areas that require data access in place of a bulky computer desk or traditional workstation. By mounting the workstations to the wall, you are able to free up and provide uncluttered floor space in exam rooms, hallways, public spaces and other high traffic areas where computer access for multiple users is necessary.

Mounted directly to a wall for a fixed height, or height adjustable when used with our wall mount track, our solutions provide you with the options you need to ergonomically get the job done and protect your workforce.

Features and Benefits

Wall track with safety stoppers on both ends (from 18" up to 84" long with one-inch increment)

All components are individually and easily adjustable in increments of 2 inches

VESA-compliant monitor holder that can be adjusted from portrait to landscape view and tilted to avoid glare

.

Foldable and retractable keyboard arm with sliding mouse tray

Adjustable CPU holder

Optional

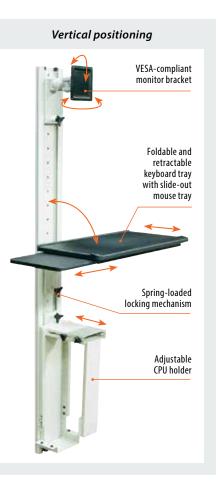

- Horizontal or vertical positioning
- Double monitor holder on single track

Horizontal track for multiple monitors

Shelves, UPS holder, mouse holder, and other accessories (see page 36)

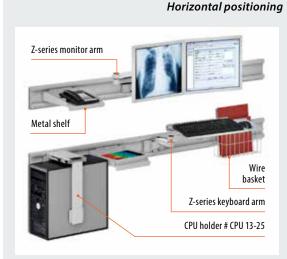

Standard Colors

Optional Monitor Arms for Wall Mounts

Wall mount for multiple monitors on horizontal track

Sample Configurations

A. Wall Mount # WM36-NH-1F-1KS-C101

C. Wall Mount # WM56-1F-KBZ-Sh-C101

 B. Wall Mount # WM56-2FZ-KB82R-U-C13_25

ACCESSORIES

Partitions

Complete your work area using AFC Partitions. These partitions absorb sound, provide privacy and prevent interference from monitors or other light sources. They can be manufactured with a tinted or clear Plexiglas panel across the top so operators can see outside of their "cubicle."

AFC offers both free-standing partitions and partitions affixed to the floor or workstation. Our partitions can be configured to suit your needs.

Features and Benefits

- One-inch sound-absorbing fiber with reflector on one side
- Cold-rolled 11-gauge steel frame with epoxy-powdercoated finish
- Prevents light interference
- Can be used as a tack board
- Multiple colors available (for frame colors, see page 39)
- 1/4" thick free-standing base

Specifications

- Width: 36", 48", 60", 72"
- Height from the floor: 60", 72"

Optional

- 1/8" tinted or clear Plexiglas top
- Fiber top with removable lower metal panel and built-in continuous cable management
- Free-standing, mobile
 (2" twin casters), or affixed to the floor/cart

Fabric Standard Colors

absorbing fiber

B. Partition 60"W x 72"H with tinted Plexiglas top

C. Partitions affixed to the floor

- D. Partitions affixed to the floor:
 - Light and sound barrier fiber top
 - Removable lower metal panel allows back CPU access
 - Built-in continuous cable management

FREE on-site consultation

At AFC we want to get it right the first time, every time, to create a custom environment for our Customers. That's why we will come to you to ensure we are maximizing your space and that everything is measured up just right. We will work with your team, at no charge to you, from the beginning to the end of your project.

FREE project support

Our team is here to assist you with your vision. We have the experience to help with your project and pride ourselves in going above and beyond to not just meet, but exceed your expectations.

FREE design service

We want to use our many years of experience creating spaces to offer you this advantage and help you go beyond your imagination. With some of the most mechanically advanced products, we will help you achieve your goals, at no additional cost to you.

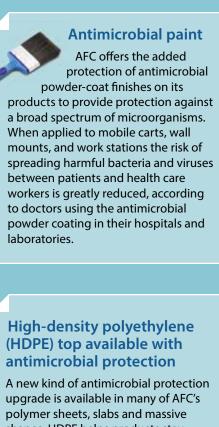

Customization

AFC can easily customize all products to adapt to your professional and individual requirements. Whether you need help choosing the right components to configure a product or are considering a complete room redesign, our staff is committed to offering you assistance every step of the way.

Outstanding customer support

Our experienced sales and engineering teams are here to walk you through the process from the smallest to largest jobs. Building rapport with our customers is a driving force throughout the relationship and is maintained during the entire project including follow-up.

LATEST TECHNOLOGIES

shapes. HDPE helps products stay cleaner between cleanings and inhibits the growth of product-damaging microorganisms, including bacteria, algae and fungi on the surface. Microbe cell walls that come into contact with HDPE are destroyed on contact, without creating opportunities for adaptive or resistant strains to form. Because the antimicrobial agent is bonded at the atomic level throughout the sheet, it will not leach out of the product. This means the agent retains its effectiveness throughout the life of the product and does not harm the environment.

It is safe, non-toxic and non-hazardous to ship and handle. The product is EPA-registered and listed with the FDA as a modifier to medical devices.

Products made using AFC's polymers with HDPE are easy to clean, disinfect and keep hygienic using standard cleaning procedures. Constant use of cleaning solutions will not affect any polymer.
